To Whom It May Concern:

It is my goal to make the City of Allentown a safe place to live, work and play.

We thought surveillance cameras would be a useful tool to assist our police department in reducing and preventing crime across the city. The eye in the sky is a perfect compliment to feet on the street.

The city chose Communication System Inc. (CSI) as our wireless surveillance project integrator. At each phase of the project; design, engineering, project management, installation and service; CSI has delivered on time and on budget.

Since first going on-line in October 2007, the system has paid tremendous dividends. The cameras continue to be an effective evidence obtaining tool. There have been numerous instances where the cameras detect criminal activity long before a 911 call is placed.

CSI understands the needs of government and law enforcement. They have been a great partner in developing and deploying technical solutions in public safety.

Sincerely,

ED PAWLOWSKI  
Mayor
